FULL-STACK DEVELOPER | SOFTWARE ENGINEERING CANDIDATE

Web Full Stack student focused on clean architecture, scalable interfaces, APIs, databases, and AI-assisted development workflows. Interested in Turkish universities and Bachelor programs in Software Engineering, Computer Engineering, Computer Science, and Informatics.

EXPERIENCE

Front-End Developer Intern - Gemini-IT, Belgium (Remote) | Aug 2025 - Present

- Develop AngularJS front-end interfaces, UI components, and web application features.
- Collaborate remotely with a technical team using structured tasks, debugging, and iterative improvements.
- Apply practical software workflow habits: Git, documentation, refactoring, API integration, and maintainable UI structure.

PROJECTS - 17+ TOTAL

- **FeatureShoes / Markhifs E-commerce:** React, Tailwind - product catalog, cart flow, checkout and responsive shopping UI.
- **Personal Portfolio Website:** ismailmarkhi.dev - project showcase, skills, academic goals and software profile.
- **Order Tracking System:** React, Tailwind, Laravel, MySQL, XAMPP - order states, backend logic and monitoring interface.
- **AI Frontend Generator:** AI-assisted workflow that generates React/Tailwind UI from prompts and documentation.
- **OOP Learning Platform:** Interactive platform for object-oriented programming concepts and structured learning.
- **Les Jardins de Versailles / Verdura:** Professional landing page with responsive React/Tailwind architecture.
- **GDP Public Debt Management:** Government-style dashboard concept for loans, notices, payments, roles and modular UI.
- **Additional portfolio work:** 17+ projects across React, Laravel, PHP, JavaScript, databases, UI/UX and learning systems.

EDUCATION
