Profile

Full-stack web developer with 2 years and 9 months of practical development, self-driven project building, and remote internship exposure with Gemini-IT Belgium (Remote) . Built 17+ projects across e-commerce, dashboards, order tracking, portfolios, landing pages, and AI-assisted frontend workflows. Strong fit for Software Engineering / Computer Engineering studies because the portfolio proves applied learning, discipline, and technical progression.

Education

Specialized Technician - Digital Development, Web Full Stack

2024 - 2026

OFPPT - ISTA Hay Riad, Rabat

- Completed 10+ projects using React, Laravel, Tailwind CSS, JavaScript, PHP, MySQL, and Node.js.
- Built practical web systems from requirements analysis to UI architecture, backend logic, database design, deployment, and technical documentation.
- Developed strong foundations in static websites, dynamic web applications, technical communication, and full-stack development workflows.

Baccalaureate - Physical Sciences, French Option

2023 - 2024

AL Mansour Edahbi, Ain El Aouda

- Completed a science-focused baccalaureate program with a satisfactory academic distinction, including coursework in mathematics, physics, chemistry, and life sciences.

Employment

Frontend Developer Intern Gemini-IT Belgium, Remote

Aug 2025 - Present

- Developed front-end interfaces and UI components using AngularJS
- Collaborated remotely with a technical team; strengthened communication, task discipline, and delivery habits.
- Worked on maintainable layouts, component structure, debugging, and user interface improvements.

Selected Projects

FeatureShoes E-commerce

React/Tailwind shopping interface with product catalog, cart logic, checkout flow, and responsive UX.

FeatureShoes Static Version

Old static version of the FeatureShoes e-commerce website built with HTML, CSS, and JavaScript before the newer React and Tailwind version.

Order Tracking System

Laravel, MySQL, React, Tailwind, XAMPP - order lifecycle, state tracking, REST-oriented logic, and monitoring dashboard.

MySQL	
MongoDB	
SQL schema design	
Git	
GitHub	
GitLab	
Docker	
XAMPP	
VS Code	
Figma	
Jira	
ChatGPT	
Gemini	
Claude	
Copilot	
OpenRouter	
prompt-based UI generation	
Clean project structure and maintainable components	
Fast learner with applied portfolio evidence	
Strong motivation for international study and technical specialization	

Languages

Arabic	
French	
English	
German	

Hobbies

Playing football / Swimming

Personal Portfolio

[ismailmarkhi.dev](#) - professional portfolio presenting projects, academic background, links, and scholarship profile.

AI Frontend Generator

AI-assisted workflow generating React/Tailwind UI components from structured prompts and performance documentation.

GDP Dashboard System (Volunteer Project)

Government-style public debt dashboard concept with modular React architecture and professional UI patterns.

Verdura / Les Jardins de Versailles (Volunteer Project)

Responsive React/Tailwind landing page with polished sections, visual hierarchy, and scalable components.

OOP Learning Platform

Interactive educational platform for object-oriented programming concepts and structured learning navigation.

Additional 10+ projects

Public Decoration Platform, Dentist Website, Landing Page 25, Stopwatch, Current Time App, FeatureShoes static version, JavaScript practice apps, and UI/UX landing pages.

Career Objective Interest

Career Objective

Seeking a Bachelor/Licence opportunity in Software Engineering, Computer Engineering, or Computer Science to strengthen my foundations in algorithms, databases, systems, and scalable web application development.

My long-term goal is to become a full-stack software engineer capable of building reliable digital systems for businesses and public-sector services.

Scholarship & Study Fit

Scholarship & Study Fit

Target: [Software Engineering](#), [Computer Engineering](#), [Computer Science](#)

- Clear progression from Bac Sciences Physiques to high performance documentation.
- Portfolio, GitHub, and project documents support practical readiness.
- International goal: study seriously and build useful software skills.
