

ISMAIL MARKHI

Full-Stack Web Developer

Ain El Aouda, Morocco | +212 773 320 673 | ismailmarkhi17@gmail.com
ismailmarkhi.dev | github.com/IsmailMarkhi | linkedin.com/in/ismail-markhi-a67033317

PROFESSIONAL SUMMARY

Full-stack web development graduate (OFPPT, Morocco) with hands-on experience across React, Laravel, PHP, Python, and both relational (MySQL) and NoSQL (MongoDB) databases. Independently designed, built, and deployed multiple end-to-end web applications spanning UI, backend logic, and data layers. Seeking junior or graduate full-stack developer roles internationally; open to relocation.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, SQL
- **Frontend:** React, Inertia.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Laravel
- **Databases:** MySQL, MongoDB
- **Tools:** Git, Docker

SELECTED PROJECTS

Rota Developer OS *(In Progress) (Laravel, React, TypeScript, Inertia.js, MongoDB, Docker)*

- Building a developer workspace generation platform that lets developers spin up new Laravel projects in seconds via one-click, downloadable project archives.
- Implementing an end-to-end workspace generation pipeline: template loading, workspace creation, template copying, and project artifact generation.
- Built a modular, feature-based architecture covering authentication, dashboard, and workspace management.

FeatureShoes – E-commerce Web Application *(React, Tailwind CSS)*

- Built a responsive e-commerce interface for athletic footwear, implementing product browsing, cart logic, and a checkout-oriented user flow.

Portfolio Website – ismailmarkhi.dev *(React, Tailwind CSS)*

- Designed, built, and deployed a personal developer portfolio with project showcases, SEO metadata, and a fully responsive layout.

Order / Ticket Tracking System *(Laravel, MySQL, React, Tailwind CSS)*

- Developed a full-stack order management system: built Laravel backend modules for order creation and status updates, designed a relational MySQL schema for orders and customers, and built a React/Tailwind interface for tracking order status.

OOP Learning Platform *(PHP, JavaScript, MySQL)*

- Built an interactive learning platform for object-oriented programming concepts, including lessons, quizzes, and practice exercises.

EDUCATION

Specialized Technician – Digital Development, Web Full Stack

OFPPT – ISTA Hay Riad, Rabat, Morocco | 2024 – 2026

- Training focused on full-stack web application development: front-end technologies, backend fundamentals, databases, and practical project work.

Baccalauréat – Physical Sciences

Morocco | 2024
