

ISMAIL MARKHI

Full-Stack Web Developer

Ain El Aouda, Morocco | +212 773 320 673 | ismailmarkhi17@gmail.com
ismailmarkhi.dev | github.com/ismailMarkhi | linkedin.com/in/ismailmarkhi

Full-Stack Web Developer with practical experience building web applications using Laravel, React, TypeScript, Python, and Docker. Experienced in designing backend APIs, developing responsive interfaces, and building scalable personal software projects. Open to full-stack developer roles, internships, alternance (work-study) programs, and further study opportunities, internationally.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, SQL
- **Frontend:** React, Angular, Inertia.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Laravel, Express.js
- **Databases:** MySQL, MongoDB, NoSQL Databases
- **Tools & DevOps:** Git, Docker, Postman, Vercel
- **Software Engineering:** REST APIs, Object-Oriented Programming, Database Design

EXPERIENCE

Gemeni IT | Software Development Trainee

Aug 2024 – Aug 2026

- Participated in feature definition and software conception activities.
- Contributed to frontend development using Angular and TypeScript.
- Developed and improved user interface components using CSS and Tailwind CSS.
- Collaborated in a team-based software development environment.

SELECTED PROJECTS

Rota Developer OS *(In Progress) (Laravel, React, TypeScript, Inertia.js, MongoDB, Docker)*

- Building a developer workspace generation platform that enables developers to start building immediately by generating production-ready Laravel workspaces in seconds.
- Developed an end-to-end workspace generation pipeline: template loading, workspace creation, template copying, and project artifact generation.
- Built a modular, feature-based architecture covering authentication, dashboard, and workspace management.

FeatureShoes – E-commerce Web Application *(React, Tailwind CSS)*

- Built a responsive e-commerce interface for athletic footwear, implementing product browsing, cart logic, and a checkout-oriented user flow.

Portfolio Website – ismailmarkhi.dev *(React, Tailwind CSS)*

- Designed, built, and deployed (via Vercel) a personal developer portfolio with project showcases, SEO metadata, and a fully responsive layout.

Order / Ticket Tracking System *(Laravel, MySQL, React, Tailwind CSS)*

- Developed a full-stack order management system: built Laravel backend modules for order creation and status updates, designed a relational MySQL schema for orders and customers, and built a React/Tailwind interface for tracking order status.

OOP Learning Platform *(Python, React, Tailwind CSS)*

- Built an interactive learning platform for object-oriented programming concepts, including Python OOP examples, with a React and Tailwind CSS interface — lessons, quizzes, and practice exercises.

EDUCATION

Specialized Technician – Digital Development, Web Full Stack

OFPPPT – ISTA Hay Riad, Rabat, Morocco | 2024 – 2026

- Training focused on full-stack web application development: front-end technologies, backend fundamentals, databases, and practical project work.

Baccalauréat – Physical Sciences

Morocco | 2024
